Complete Spanish Curriculum

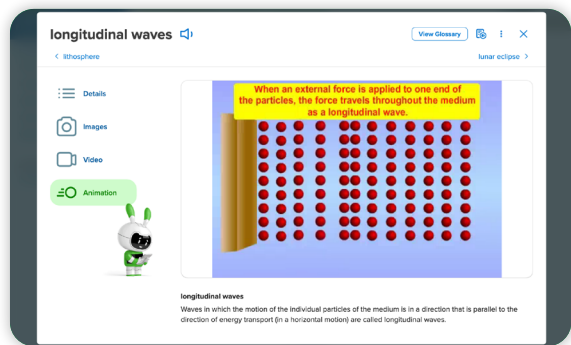

Science Techbook for Texas is available in English and authentically translated Spanish in print and digital. Students, families, and teachers can easily switch between both languages using the language toggle. The toggle changes text, video narration, interactives, vocabulary, and formative and summative assessment items.

Immersive Reader for 100+ Languages

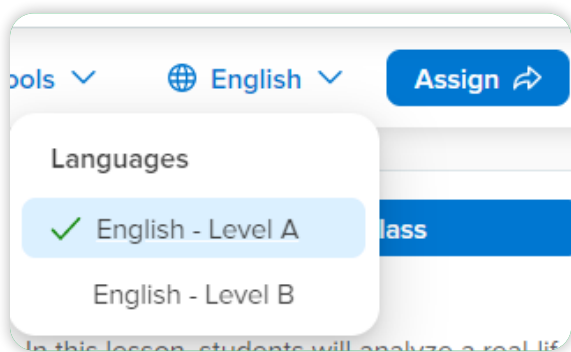

The embedded Microsoft Immersive Reader supports struggling readers, Emergent Bilinguals, and any student needing more accessible content within *Science Techbook for Texas*. It offers text translation in 100+ languages (including Chinese, German and Vietnamese), the ability to customize font size, color, and spacing, a picture dictionary, and the option to hear text read aloud.

Additional Language + Literacy + Support

Interactive Glossary

The Interactive Glossary fosters the acquisition of academic language and domain-specific vocabulary. Students can access the embedded vocabulary terms or the course glossary within each lesson to hear, read, and practice vocabulary related to each Concept. The Interactive Glossary includes Immersive Reader, where 100+ languages are supported (including Chinese, German and Vietnamese).

Lexile Level Toggle

Students and families can easily switch between two different Lexile reading levels in grades 3-8. Reading level B is approximately 200 Lexile lower than reading level A. Teachers can also assign specific reading levels to students as needed.

Original Content in English and Spanish

Real World Phenomena Jr., a DE Original Series, introduces engaging science phenomena through short videos paired with ready-to-use instructional activities that bring science to life! The Spanish Phenomena Jr. videos feature native Spanish-speaking student actors.
